Our Nappa Leather is sourced from the finest European raw hides, carefully selected to minimize flaws. We ensure that only a slight correction is made, preserving the hide's natural grain, resulting in a soft and smooth texture. Each hide measures between 4.5-5.0 sqm and has a thickness of 1.0-1.3 mm.

Dyed and processed in renowned Italian tanneries, our leather exhibits a semi-matte finish, making it an ideal choice for automotive upholstery.

Celebrated for its durability, comfort, and natural origin, it is normal for certain parts of the hides, particularly the edges, to have larger grains.

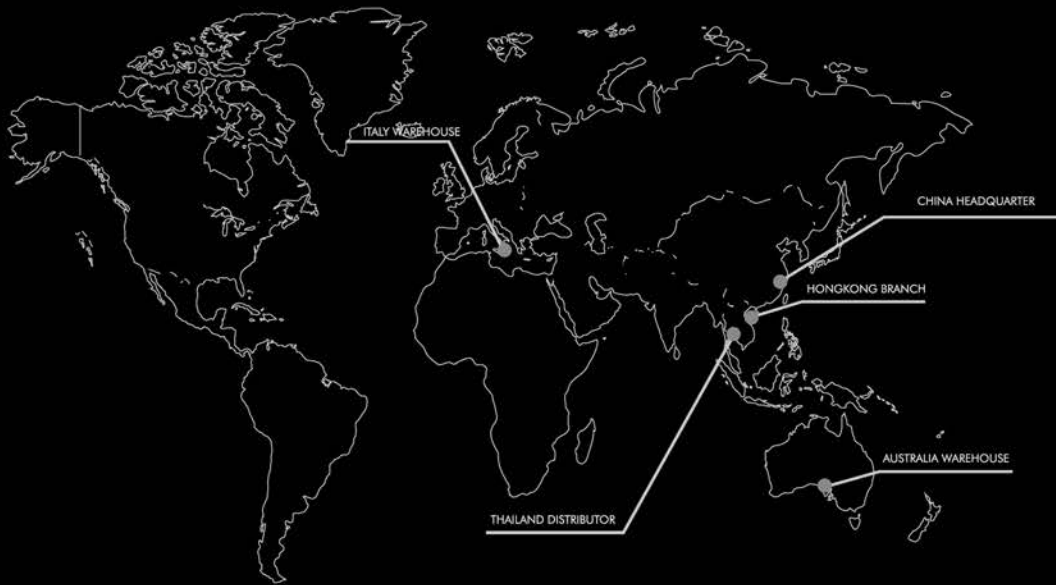

Understanding Your Leather Purchase:

Genuine leather unique traits may cause natural variations in shade and texture, both within a single hide or between different hides. We ensure each hide is carefully inspected and free from excessive defects before sale, some signs of natural origin are inevitable. Hide sizes vary from 4.5 to 5.0 m², please contact us for information on current availability.

While our samples provide a reliable guide to color and finish, please note that achieving an exact match is not guaranteed.
